

NEWBERRY
GROUP

**Information Assurance Experts, Employee-Owned,
Proven Cyber Security and Mission-Enabling Solutions**

Who We Are

Newberry Group is an experienced team of highly-skilled, certified information assurance and IT support professionals with security clearances serving commercial markets and federal, state and local governments. Our team enables organizations to improve bottom line results by reducing complexity, improving efficiency, and reducing the risks and threats often associated with the introduction of new technologies. As an IT firm, with a speciality in information assurance Newberry Group provides:

- **Cyber Security Solutions**
- **Digital Forensics and Incident Response**
- **IT Support Services**
- **Consulting, integration and reseller services**
- **Training and Education**

The Newberry Difference

Expertise in a range of services

including professional consulting, engineering, integration, installation, and training.

Employee-owned = results oriented;

We empower our employees to engage and collaborate with our clients to design and deploy the best solutions.

Our solutions address the business and mission challenges of today with a focus on tomorrow;

We provide proven professionals with the right competencies to ensure a strong ROI.

Highly selective technology

partnerships provide clear, integrated, 'best-in-class' solutions.

Partner-certified engineers

bring real-world expertise to the classroom in our training courses.

We service companies and agencies

of all sizes. As a flexible small business, we provide an agile approach to security solutions.

IT Support Services

Newberry Group's IT support and integration services are proactive and personalized to each organization. Our services include implementation, support and installation, training, configuration management, network administration, network contingency operations and recovery, and help desk support. By increasing your on-site staff, Newberry offers:

- Computer Network Defense (CND)
- Technical Architectural Development
- System Engineering
- Network Engineering
- Network Management / Administration
- Data Center Operations Support
- Help Desk/Service Desk Support
- Program Management
- Database Design and Administration
- Independent Verification & Validation (IV&V)

Digital Forensics & Incident Response

Digital Forensics - Using industry standard practices and in-depth experience, we preserve and analyze digital evidence in support of litigation, incident response, and regulatory compliance.

Our eDiscovery services cover the full evidence life cycle for litigation support including collection, processing, hosting, and production.

Incident Response - Prolonged Information security incidents leave an organization vulnerable and dramatically increase enterprise losses. We have extensive experience in containing and investigating these incidents while deploying response plans to halt unauthorized activity and restore IT systems to an acceptable state of trust.

Malware Analysis - A proper incident response must include malware analysis. Newberry's comprehensive capabilities include reverse engineering, detailed reporting, and payload analysis.

Training & Education

- Vendor-certified training on our technology partner products. Visit our website for current class schedules: www.newberrygroup.com/Training.aspx
- Custom training classes available
- Curriculum development and distance learning solutions

OUR TECHNOLOGY PARTNERS:
