

## STEER YOUR TACTICAL DEFENSES IN THE RIGHT DIRECTION WITH CYBER THREAT INTELLIGENCE

Cyber threats continue to wreak havoc on organizations with data breaches resulting in lawsuits and liability issues, regulatory penalties and fines, lost customers, impact on the company brand, lost jobs and ultimately an impact on your bottom line. The average data breach takes more than 200 days to detect, so why continue with a failed detect and respond approach?

With cyber threat intelligence you can gain the visibility you need to set the proper security strategy—ensuring you get the most value out of your security investments and drive the most effective use of your tactical defenses.

## GAIN A 360° VIEW OF CYBER THREATS RELEVANT TO YOUR BUSINESS

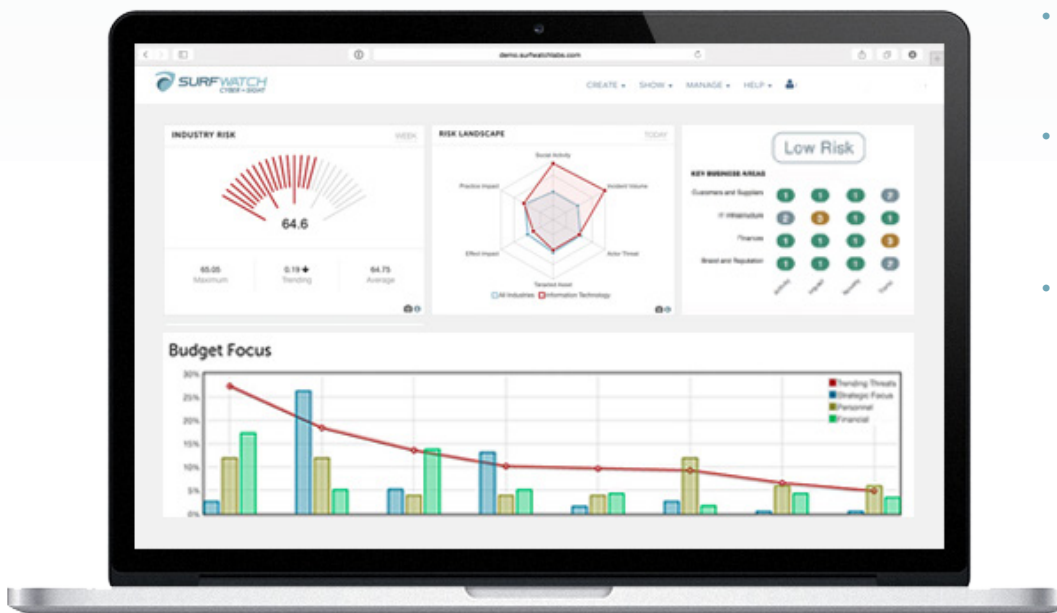

The SurfWatch Threat Intelligence Suite provides you with visibility of the most relevant threats from outside your company walls and compare to what you're seeing in your SOC and supply chain. The SurfWatch Suite is a set of integrated SaaS-based products, built on top of powerful cyber threat data and analytics, that can easily be tailored to improve cyber risk understanding and collaboration across all of your core business functions.

Get out from under the avalanche of the bits and bytes and quickly understand the most relevant cyber threats, the potential impact on your business operations and how best to mitigate the risk.

## KEY BENEFITS
